**Liebe Kundin, lieber Kunde,**

Wir dank Ihnen Bestellung!
Gleichzeitig ob Sie ein aus Naturholz gefertigtes Möbelstück gekauft haben, eine Hochglanzfront oder eine matte Kunststofffront – jedes Möbelstück hat seine ganz speziellen Eigenschaften. Auch Holzbeschaffenheit und -struktur, Naturholzbeinle oder Astbe in der Naturholzbeinle, sind Teil der individuellen Ausgestaltung jedes einzelnen Möbelstückes.

Da Möbel aus Naturholz ständigen Klima- und Feuchtigkeitsschwankungen ausgesetzt sind, können vereinzelt Veränderungen in der Oberfläche auftreten wie z.B. Haarrisse oder Farbveränderungen.

Generell nimmt im Laufe der Zeit die Helligkeit ab und die Farbsättigung zu – das Holz dunkelt nach.

Die im Natur-Rohstoff wie Holz ein normaler Prozess. Dieses Buchlein soll Ihnen ein paar Tipps zur Pflege Ihres Möbelstücks geben, damit Sie lange Freude daran haben können.

**Grundätzlich gilt:**

• Möbelen sind Gegenstände auf die ein gewisses Maß an Verschleiß einzuwirken kann.

- Keine Kratzen direkt auf die Möbel stellen.
- Verschlütete Flüssigkeiten sofort aufwischen.
- In regelmäßigen Abständen einen festen Sitz von Schrauben und Beschlägen kontrollieren.
- Der typische, aromatische Holzgeruch von Naturholzmöbeln immer ein Zeichen für Qualität.
- Heiße Stellen an den Händen entstehen durch einen natürlichen Hautausstritt und können mit einem trockenen, fusselfreien Tuch abpoliert werden.

• Auch von anderen Holz-, Lack-, Leder- oder Polstermaterialien ist ein schwacher Eigengeruch am Anfang unvermeidbar. Diese Gerüche verschwinden mit der Zeit von allein.
• Was Sie tun können:
• Lüften Sie in der Anfangszeit häufiger und/oder wischen Sie die Möbel leicht feucht mit Wasser aus, das mit ein wenig Essig versetzt ist.

• Bewahren Sie diese Hinweise gut auf.

**Pflegehinweise für Möbel aus Plattenwerkstoffen**

Verwenden Sie zur Pflege Ihres Möbels aus Plattenwerkstoffen am besten ein weiches, sauberes, nicht-abrasives Lintuch. Wischen Sie die Oberflächen leicht feucht ab.

**Grundätzlich gilt:**
Verwenden Sie bitte auf keinen Fall folgende Reinigungs- und Pflegemittel:

- **Microwaschmittel** oder **Schmutzradierer**. Diese enthalten häufig feine Schmelzpartikel, die zu einem Zerknätzen der Oberfläche führen können.
- **Scharfe chemische Substanzen** sowie **scheuernde Putz- oder Lösungsmittel**. Diese können die Oberflächen ebenfalls beschädigen;

• **Scheuerpulver, Stahlwolle** oder **Topfkratzer**. Sie zerstören die Oberfläche so stark, dass eine Aufarbeitung nicht mehr möglich ist;

• **Staubsauger** und **Bürsten** können die Oberflächen durch zu hohen Druck und die Hitze, mit denen der Wasserdampf auf die Oberflächen trifft, können diese beschädigt werden oder sich sogar vom Untergrund ablösen.

**Beste klant,**

Hiermit danken wir uw bestelling!

Het maakt niet uit of u een meubelstuk koopt of een meubelstuk huurt. Het voorkomt of een matie plastic voorkant heel gekoekt – elk meubelstuk heeft zijn heel bijzondere eigenschappen. Ook de staat en structuur van het hout zoals kleinere takken bij natuurhouten meubelen maken deel uit van de individuele look van elk afzonderlijk meubelstuk.

Omdat meubelen van natuurhout zijn biogegeseld zijn permanente klimaatveranderingen kunnen tot veranderingen er af en toe bijdragen.
• **veranderingen in de bovenlaag** zoals haarscheutjes of kleurveranderingen. In het algemeen neemt na verloop van tijd de helderheid af en de kleurverzadiging toe – het hout wordt donkerder.
De genoemde wijzigingen vormen bij een natuurlijke groeiwijze zoals hout een normaal proces.
• **veranderingen in de paar tips** geven bijvoorbeeld een wat meer glanzend uiterlijk.
• **Wij** proberen u te helpen uw meubelstuk zo lang of lange tijd plezier aan kunt beleven.
• **The typical, aromatic wood odour is always a proof of quality for natural wood furniture.**
• **The natural emission of resin may produce bright spots on the knots which can be polished with a dry, lintfree cloth.**
• **Initially, a slight intrinsic odour is unavoidable for other wooden, paint, leather or upholstery materials too. These odours automatically disappear after a while. If you want to speed up this process, ventilate more often at the beginning and/or wipe out the furniture with a slightly damp cloth which was soaked in water mixed with a small amount of vinegar.**
• **Keep these notes in a safe place.**

**Care notes for furniture made of panel materials**
We recommend using a soft, lint-free cloth or a shammy for conditioning your piece of furniture made of panel materials. Wipe off the surfaces with a slightly damp cloth or shammy.
**The following applies in general:**
Please don't use the following detergents or cleaning agents at all:
• **microfibre cloths or dirt erasers.** They often contain fine abrasive particles which can cause scratches on the surfaces;
• **aggressive chemical substances** as well as **abrasive cleaning agents** or solvents. They may damage the surfaces too;
• **scouring powder, steel wool** or **scouring pads.** They destroy the surface so badly that reconditioning is impossible;
• **vacuum cleaners.** The nozzles and brushes can cause scratches on the surfaces;
• **steam cleaners.** The surfaces may be damaged or separated from the ground due to the high pressure and heat of the water vapour.

**In principe geldt:**
• Plaats geen hete voorwerpen op de meubelen.
• Plaats geen kaarsen direct op de meubelen.
• Veeg gemorstte vloeistoffen direct af.
• Controleer met regelmatige intervalen de beslag op houtvast van schroeven en deels.
• De typische, aromatische houtgeur is steeds een kwaliteitsbewijs bij natuurhouten meubelen.
• Heldere plaatsen aan de takken ontstaan door een natuurlijk uitdrennen van hars en kunnen worden weggepoijst met een droge, pluisjevrije doek.
• Ook van andere houten, gelakte, lederen of opstofdoffe materialen is een zwakke eigen reuk bij het begin niet te vermijden.
Deze geuren verdwijnen na enige tijd vanzelf.
Als u wilt dat het sneller gaat, verlucht u in het begin vaker en/of veeg de meubelen lichtjes vochtig af met water, dat een beetje is aangelengd met azijn.
• Bewaar deze instructies goed.

**Onderbouwstructuurs voor meubelen**
Gebruik voor de reiniging van uw meubel van plaatmateriaal het best een zachte, niet pluisdige doek of een leren doek. Veeg de oppervlakten luttel vochtig af.
**In principe geldt:** Gebruik **zeker niet** volgende reinigings- en poetsmiddelen:
• **microvezelstoffen** of **poetsmiddelen:** Deze bevatten vaak fijne slijpdeeltjes die de oppervlakten van uw meubel kunnen beschadigen;
• **scherpe chemische substanties** zoals **oplosmiddelen.** Deze kunnen de oppervlakken eveneens beschadigen;
• **schuurpoeder, staalwol** of **pannensponzen.** Ze vernietten het oppervlak zo erg dat een reparatie niet meer mogelijk is;
• **stofzuiger.** Mondstukken en borstels kunnen de oppervlakten van uw meubel beschadigen;
• **stoomreiniger.** Door de hoge druk en de hitte, waarmee de stoom op de bovenlagen komt, kunnen deze worden beschadigd of zelfs loskomen van de ondergrond.

**Dear customer,**

Thank you for your order!

No matter if you bought a piece of furniture made from natural wood, a high-gloss front or a plastic front – every piece of furniture has unique characteristics. Even the texture and structure of wood, such as small knots in natural wood furniture, are part of the individual charisma of each piece of furniture.

Since natural wood furniture are permanently exposed to climate and humidity fluctuations, changes to the surface may occur (e.g. hair cracks or changes in colour) in some cases. In general, brightness decreases and colour saturation increases in the course of time – the wood darkens.

The changes mentioned above are normal for natural raw materials such as wood. This booklet provides some care tips for your piece of furniture so that you can enjoy it for a long time.

- **Don't place any hot objects on the furniture.**
- **Don't place candles directly on the furniture.**
- **Immediately wipe off any spilled liquids.**
- **Regularly check if the screws and fittings are tight.**
- **The typical, aromatic wood odour is always a proof of quality for natural wood furniture.**

**Gentili clienti,**

Sentiti ringraziamenti per il vostro ordine!

A prescindere che abbiate scelto un mobile realizzato in legno naturale, un fronte lucido o un fronte di materiale plastico opaco – ogni esemplare ha sue particolarità. Anche le caratteristiche e la struttura del legno, quali ad esempio rami minori nei mobili di legno naturale, sono parte del fascino individuale di ogni singolo mobile.

Dato che i mobili in legno naturale sono esposti al continuo variare del clima e dell'umidità, è probabile che in superficie insorgano mutamenti quali crepe capillari o cambiamenti di colore. Generalmente con passar del tempo, diminuisce la chiarezza e aumenta la saturazione del colore – il legno si scurisce. I citati mutamenti sono un normale processo dei materiali naturali, quali appunto il legno.

Il presente libretto intende darvi alcuni suggerimenti sulla cura del vostro mobile, affinché vi procuri lunghe soddisfazioni.

**Sostanzialmente vale:**
• Non poggiare oggetti roventi sui mobili.
• Non poggiare candele a diretto contatto dei mobili.
• Asciugare subito i liquidi sversati.

- Ad intervalli periodici controllare se viti e cerniere sono salde.
- Il caratteristico odore fragrante è sempre una prova di qualità dei mobili in legno naturale.
- Le macchie chiare sui rami si formano per via della naturale fuoriuscita di resina, e sono levigabili con un panno asciutto che non lascia peli.
- Anche trattandosi di altri materiali lignei, di vernice, pelle o imbottiti, all'inizio è inevitabile un leggero odore caratteristico. Dopo qualche tempo però, questi odori svaniscono da sé.

Potele aiutare a farli volatilizzare in minor tempo cambiando più spesso aria all'inizio e/o passando sui mobili un panno umido d'acqua con qualche goccia d'aceto.
• Conservare bene le presenti istruzioni.

Per la cura dei mobili in materiali pannellati si consiglia di usare un panno morbido, che non lascia peli, o un panno di pelle. Passare il panno leggermente umido sulle superfici.
**Sostanzialmente vale: In nessun caso** utilizzare i seguenti detergenti e prodotti per la pulizia:
• **panni in microfibra o spugne a tampono.** Questi prodotti contengono spesso fini particelle abrasive, che possono provocare sgraffiature sui mobili;
• **forti sostanze chimiche nonché detersivi o solventi abrasivi.** Anche questi prodotti possono aggredire le superfici;
• **polvere abrasiva, paglietta d'acciaio** o **spugne abrasive.** Rovineranno la superficie in modo tale che non sarebbe più possibile riparare;
• **aspirapolvere.** Bocchette e spazzole possono sgraffiare le superfici;
• **pulitrice a vapore.** Per via dell'elevata pressione e calore con cui il vapore colpisce le superfici, esse rischiano di deteriorarsi o addirittura staccarsi dalla sottostruttura.
